### **GETTING EXTERNAL FUNDING**

## **Blanca Rodriguez**

**Wellcome Trust Senior Fellow in Basic Biomedical Sciences Department of Computer Science University of Oxford** 

Blanca Rodriguez

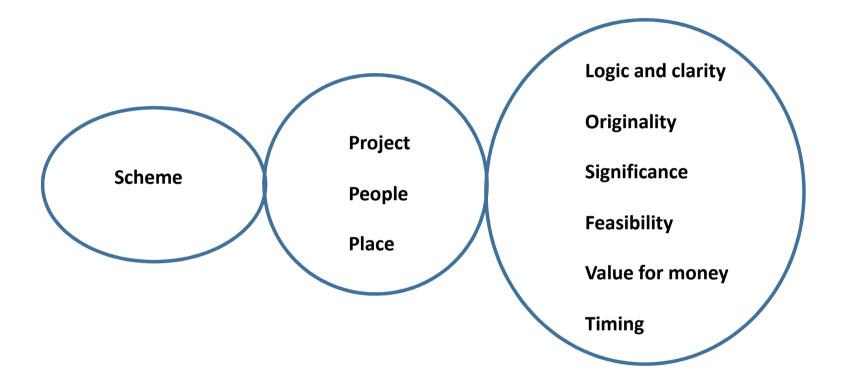

#### Where to start

- Think about your research and career plans
- Think of reasons to apply
- Think of a good idea you feel excited about and supported by your track record
- Discuss and get advice from mentors, colleagues and research facilitators
- Be prepared for hard and intense work
- Remind yourself of the reasons to apply

### Where to start

#### Scheme

#### **Types of grants**

- First/Pilot grant (1 year), Project grants (3 years), programme grants (5 years)
- Fellowships (Junior, Intermediate, Senior, Professorial)
- Consortium grants (European Comission, Partnership grants)

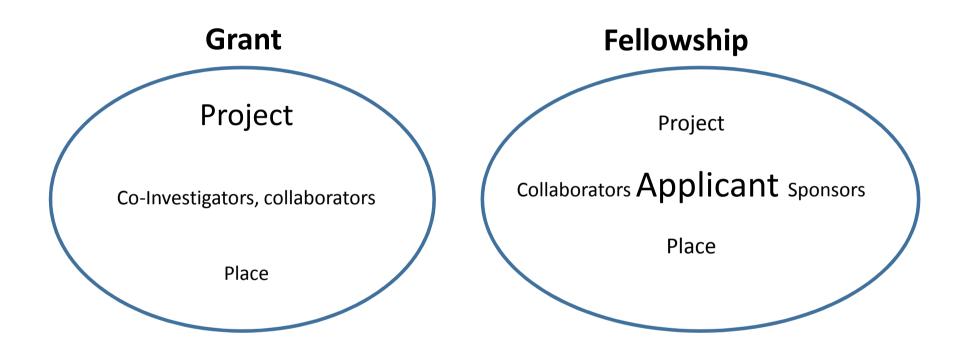

#### What to consider

- Eligibility
- Review criteria and process
- Intention of funding body (technology development, transfer, career development) Ring and discuss!
- Priority areas of research (strategy plans of funding body)
- Funding level (direct costs, indirect costs, duration)
- Balance between research and administration

## Scheme

# **Project**

Is the proposal well motivated and easy to understand? **Logic and clarity** 

Is the main goal interesting and innovative? **Originality** 

Would the research solve an important problem, have some impact? **Significance** 

Is the proposed approach likely to deliver in the timeframe and with resources requested? **Feasibility** 

Is the investment worth it? Value for money

Is this the right time? **Timing** 

Blanca Rodriguez

## **Project**

**Logic and clarity** 

Originality

**Significance** 

**Feasibility** 

Value for money

**Timing** 

### Case For Support (6 pages)

- Background (motivate research question and approach)
- Pilot data
- Aims and hypothesis
- Research Design to address the aims
- Expected value of results
- Management
- Limitations and Risks

Additional information

Justification of resources (2 pages)

Pathways to Impact (2 pages)

All sorts of summaries

# People

**Skills and Expertise** 

Track record

**Career Development and Training** 

**Feasibility** 

Value for money

Grant

**Principal Investigator** 

**Co-Investigator** 

**Collaborators** 

**Fellowship** 

**Applicant** 

Sponsor(s)

**Collaborators** 

## **Place**

Equipment
Space
Institutional support

## **Timing**

Right scheme at the right career point

Pilot data

**Publication record** 

Overall state of the field and previous funding investments

## **Review process**

**Internal feedback** 

Criteria

Eligibility checks by funding body

**Logic and clarity** 

Reviewers

**Originality** 

**Panel triage** 

**Significance** 

**Interviews** 

**Feasibility** 

**Panel ranking** 

Value for money

**Timing** 

**Decision** 

## Not getting the funding

Happens very often Frustrating Upsetting Annoying

...

Think it's a step to get funding

Perseverance – everybody fails!

Ask for feedback and use it

Be self critical

Think what might be the reasons

Improve your application/track record

Re-apply

## **Getting the funding**

Exciting
Celebrate
Make the most out of it
