

24th Symposium on Implementation and Application of Functional Languages

University of Oxford, UK

August 30 – September 1, 2012

<http://www.cs.ox.ac.uk/conferences/IFL2012/>

This year IFL will be hosted by the University of Oxford, within the idyllic setting of the dreaming spires and picturesque colleges, which have been the home to academic endeavour and research for over nine centuries. The symposium will be held between 30 August and 1 September, 2012.

The goal of the IFL symposia is to bring together researchers actively engaged in the implementation and application of functional and function-based programming languages. IFL 2012 will be a venue for researchers to present and discuss new ideas and concepts, work in progress, and publication-ripe results related to the implementation and application of functional languages and function-based programming.

Following the IFL tradition, IFL 2012 will use a post-symposium review process to produce formal proceedings which will be published by Springer-Verlag in the Lecture Notes in Computer Science series. All participants in IFL 2012 are invited to submit either a draft paper or an extended abstract describing work to be presented at the symposium. Work submitted to IFL must not be submitted simultaneously to other venues; submissions must adhere to ACM SIGPLAN's republication policy: <http://www.sigplan.org/republicationpolicy.htm>.

The submissions will be screened by the program committee chair to make sure they are within the scope of IFL, and will appear in the draft proceedings distributed at the symposium. Submissions appearing in the draft proceedings are not peer-reviewed publications. After the symposium, authors will be given the opportunity to incorporate the feedback from discussions at the symposium and will be invited to submit a revised full article for the formal review process. From the revised submissions, the program committee will select papers for the formal proceedings considering their correctness, novelty, originality, relevance, significance, and clarity.

Topics

IFL welcomes submissions describing practical and theoretical work as well as submissions describing applications and tools. If you are not sure that your work is appropriate for IFL 2012, please contact the PC chair at ralf.hinze@cs.ox.ac.uk. Topics of interest include, but are not limited to:

- » language concepts
- » type checking
- » contracts
- » compilation techniques
- » staged compilation
- » run-time function specialization
- » run-time code generation
- » partial evaluation
- » (abstract) interpretation
- » generic programming
- » automatic program generation
- » array processing
- » concurrent/parallel programming
- » concurrent/parallel program execution
- » functional programming and embedded systems
- » functional programming and web applications
- » functional programming and security
- » novel memory management techniques
- » run-time profiling and performance measurements
- » debugging and tracing
- » virtual/abstract machine architectures
- » validation and verification of functional programs
- » tools and programming techniques
- » (industrial) applications of functional programming

Submission details

Prospective authors are encouraged to submit papers or extended abstracts to be published in the draft proceedings and to present them at the symposium. All contributions must be written in English, conform to the Springer-Verlag LNCS series format and not exceed 16 pages. The draft proceedings will appear as a technical report of the Department of Computer Science of the University of Oxford.

Invited Speaker

Fritz Henglein, from the Department of Computer Science at the University of Copenhagen, is the invited speaker of IFL 2012. He will be talking about "generic sorting and partitioning in linear time and fully abstractly—simultaneously".

Peter Landin Prize

The Peter Landin Prize is awarded to the best paper presented at the symposium every year. The honoured article is selected by the program committee based on the submissions received for the formal review process. The prize carries a cash award equivalent to 150 Euros.

Important dates

- » Presentation submission deadline:
July 30th, 2012
- » Notification of acceptance:
August 1st, 2012
- » Early registration deadline:
August 10th, 2012
- » IFL 2012 Symposium:
August 30-September 1, 2012
- » Submission for (post) review process:
November 30th, 2012
- » Notification Accept/Reject:
February 4th, 2013
- » Camera ready version:
March 18th, 2013

Programme committee

Edwin Brady, University of St. Andrews
Andrew Butterfield, University of Dublin
Matthew Flatt, University of Utah
Andy Gill, University of Kansas
Stephan Herhut, Intel Labs, Santa Clara
Ralf Hinze (Chair), University of Oxford
Zhenjiang Hu, National Institute of Informatics
Patrik Jansson, Chalmers University of Technology
Mauro Jaskelioff, Universidad Nacional de Rosario
Gabriele Keller, University of New South Wales
Simon Marlow, Microsoft Research
Pablo Nogueira, Technical University of Madrid
Bruno Oliveira, Seoul National University
José Nuno Oliveira, University of Minho
Rinus Plasmeijer, Radboud University Nijmegen
Tom Schrijvers, Ghent University
Tim Sheard, Portland State University
Wouter Swierstra, University of Utrecht
Peter Thiemann, University of Freiburg
Simon Thompson, University of Kent
Steve Zdancewic, University of Pennsylvania
