

**Final Honour Schools of Computer Science,
Computer Science and Philosophy and
Mathematics and Computer Science**

First Public Examination 2022

Notice to Candidates from the Examiners in Computer Science

Purpose of this notice

Full particulars of the examinations are given in the Examination Regulations 2021, and the Examination Conventions for 2021/22 can be found at

<http://www.cs.ox.ac.uk/teaching/examconventions/bacompsci.html>

You can find the examination regulations here:

[Preliminary Examination in Computer Science](#)

[Preliminary Examination in Mathematics and Computer Science](#)

[Preliminary Examination in Computer Science and Philosophy](#)

This notice is confined to matters that may need emphasis or amplification. It is addressed only to candidates in the Honour Schools of Computer Science, Computer Science & Philosophy and of Mathematics & Computer Science. If you are a candidate from another school (for example Mathematics) then you should refer for information to notices circulated by the chairmen of examiners in those schools.

The marking and classification scheme for prelims is described in the Examination Conventions.

PLEASE READ THIS NOTICE CAREFULLY!

Independence of Examiners

Please note that you are not allowed to contact the examiners directly. Any communication must be via the Senior Tutor of your college, who will contact the Proctors if appropriate. The Proctors will in turn communicate with the Chair of Examiners.

Conduct of the examination

You will be required to show your University Card at the start of each examination session.

Calculators: The Regulations state that "The use of calculators is generally not permitted but certain kinds may be allowed for certain papers".

Calculators will be permitted for papers CS3 (A10100W1), MCS3 (A10149W1) and CSP3 (A10102W1) (papers involving Continuous Mathematics and Discrete Mathematics). For these papers, you may bring into the examination room one calculator from the list of types that follows:
CASIO fx-83 (any model), fx-85 (any model),
SHARP EL-531 (any model)

Candidate Number: You will have been issued with a candidate number and you should make sure that your *candidate number* (but **not** your name or college) is written on every booklet you use. It is available in Student Self Service and is NOT the number on your card. The marking of the examination - including practical work - is conducted anonymously. All work handed in must be attached to a cover sheet marked with that number. Even if you submit no written work for an examination which you attend, you should submit a cover sheet. Neither your name nor your college should appear anywhere on the script.

Writing your exam: For written papers you will write your answers in booklets provided (probably lined ones for Computer Science papers and plain paper ones for Mathematics papers). Start new questions in a new booklet. You may not bring your own paper. All the writing paper you use must be handed in, **including rough work** (which we will not look at or mark). You can cross out a page of rough work, or you can mark a whole booklet as rough work. If the front page of the booklet contains some writing area, it is for examiners' use only. Please do not use it for your answers.

On each Computer Science paper you will see in the bottom right of the page "NEXT PAGE" where there is a following page. The final page of the exam paper has "LAST PAGE" printed on it. Please make sure you have seen all pages of the paper.

Queries during the examination: It will not be possible to query the content of the exam paper during the exam. If you think that there is an error or mistake in your exam paper then you should state what you consider the error or mistake to be at the start of your answer for that question and, if necessary, you should state how you are interpreting the question. You should then try to complete the paper as best you can.

Legibility: Please write legibly, in blue or black pen (not pencil except for diagrams). Illegible scripts, if they are to be considered by the examiners, will be typed at your expense.

Timetable

You will receive your individual timetable in Student Self Service in due course, at the latest two weeks before the first exam is scheduled.

Practical work

Submitting your practical work: We will take the marks from our Minerva database. You will be sent a record of your practical marks and will be asked to alert the department of any discrepancies.

In addition, you will be asked to upload your practicals in one zip file to Inspira. Please only include what you have used for signing off, and nothing else. Do not include your name either on the practicals themselves, or in the file name. Everything must be labelled with your candidate number.

The deadline for the submission of your practicals is noon on Friday 27th May.

Assessment of Practical Work: The examiners will determine a mark for the practical work associated with each computer science paper, taking into account the provisional mark assigned by the demonstrator and their own assessment of the work submitted.

Each candidate must also satisfy the assessors in the practical seminars for Ethics and Responsible Innovation in order to pass the practical element of the examination.

Practicals do not contribute to the classification of candidates but each candidate must pass the practical course in order to pass the examination.

Consideration of Mitigating Circumstances

If you believe your performance in assessment has been seriously affected by circumstances related to COVID-19 and/or serious personal circumstances such as acute serious illness, chronic illness (including mental health conditions) bereavement etc. you can submit a mitigating circumstances notice to your examiners (MCE) either directly or via your college.

Further information can be found at <https://www.ox.ac.uk/students/academic/exams/problems-completing-your-assessment>

Results

The final examiners' meeting is scheduled to be held in the middle of July and the examiners hope to be able to publish results shortly thereafter.

Difficulties

Any candidate who encounters difficulties with any of the above should discuss the matter with his or her tutor without delay.

Prof M. Goldsmith
Chairman of Examiners
Preliminary Examination in Computer Science,
Computer Science & Philosophy and
Mathematics & Computer Science
(Trinity Term 2022)
