For further details please see over

Oxford University Computing Laboratory
Wolfson Building, Parks Road, Oxford, OX1 3QD

Demonstrations in Room 380

Come and see some of our students demonstrate their projects.

Students	Title
Stuart Golodetz	The Hesperus Engine / Shipwreck Map Editor
Julian de Hoog	Multi-robot Exploration in a Search-and-Rescue Application
Jie Ma	Robot Football
Jamie Frost	Automated Marking of Exam Papers Using Semantic Parsing

Undergraduate Practicals in Room 379

Jim Whitehead and Tom Harper, teaching assistants here at the Computing Laboratory take you through a practical session.

This hands-on session will introduce you to some of the most important ideas in computer programming in an interactive, visual way. The activity is about a language for describing pictures.

Software Demonstrations in Atrium

Java-applets

Please feel free to have a go at these activities, you will find a worksheet beside each one, (if you get stuck please ask one of the student helpers!)

Talk

At 1.45pm Dr Stephen Drape, our schools liaison and access officer will give a short talk about Computer Science at Oxford.
