Final Honour Schools of Computer Science
and Mathematics and Computer Science

Part B Examination 2010

Notice to Candidates
from the Examiners in Computer Science

Purpose of this notice
Full particulars of the examinations are given in the Examination Regulations 2009, and the Examination
Conventions for 2010 can be found at
http://www.comlab.ox.ac.uk/teaching/examconventions.html

This notice is confined to matters that may need emphasis or amplification. It is addressed only to candidates
in the Honour Schools of Computer Science and of Mathematics & Computer Science. If you are a
candidate from another school (for example Mathematics or ECS) then you should refer for information to
notices circulated by the chairmen of examiners in those schools.

The marking and classification scheme for finals is described in the Examination Conventions.

Independence of Examiners
It must be stressed that to preserve the independence of examiners, candidates are not allowed to contact
them directly about matters relating to the content or marking of papers. Any communication must be via
the Senior Tutor of the candidate’s college, who will contact the Proctors if appropriate. The Proctors will
in turn communicate with the Chairman of Examiners.

Conduct of the examination

Candidates will be required to produce their University cards at the start of each examination session.

The marking of the examination - including practical work - is conducted as far as possible in ignorance of
the candidates' names and colleges. To this end the following points are to be observed:

Scripts: Every candidate will be provided with an examination number, and all work handed in
must be attached to a cover sheet marked with that number. Even if the candidate submits no written
work for an examination which he or she attends, a cover sheet should be submitted. Neither the
name nor the college of the candidate should appear anywhere on the script.

Practicals: Each separate report of practical work should be conspicuously labelled with the
candidate's examination number only, and not with the candidate's name or college.1 Please also
ensure that each report clearly indicates the subject and number of the exercise, e.g. Compilers,
practical exercise 3. See also the section on "Practical work".

Calculators: The Regulations (pp. 205, 329) state that "The use of calculators is generally not permitted but
certain kinds may be allowed for certain papers". Papers for which calculators will be allowed are Intelligent Systems I and Intelligent Systems II. For these
papers only, candidates may bring into the examination room one calculator from the list of types that
follows: CASIO fx-83 (any model), fx-85 (any model), SHARP EL-531 (any model).

---

1 This regulation is designed for your own protection. However, it is not the policy of the examiners to penalise
candidates who inadvertently break this rule when handing in practicals and projects.
Rough work: All work, including rough work, must be submitted on the paper provided, and must be handed in at the end of the examination. Candidates should not bring their own paper.

Legibility: Illegible scripts, if they are to be considered by the examiners, will be typed at the candidate's expense.

Handing in: Each candidate is responsible for handing in his or her scripts, appropriately bundled according to the instructions (if any) on the examination paper. Each bundle must have a completed cover sheet, and candidates should hand in an empty cover sheet for those sections of a paper from which they attempt no questions.

Timetable
The detailed timetable for the Examination has yet to be finalised by the Clerk of Schools. Candidates will receive a copy of this from the Clerk of Schools in due course. The Examiners will also make the timetable available via the Computing Laboratory website.

Composition of papers
The details below are confined to Part B; similar details for papers under the control of other schools should be sought from those schools.

</table>

On all Computer Science papers there will be an indication of how many marks out of the total of 25 are allocated to each part of each question. This is intended as a guide to candidates in allotting time and effort.

Where a candidate offers two option papers that are timetabled in a single three-hour session, he or she may work on both papers for the full three hours, but may answer at most 2 questions from each paper.
Practical work

Presentation of Practical Work: The practical work must be bound together in a single file (or packed in a single envelope) addressed to the Chairman of Examiners in Computer Science (or Mathematics and Computer Science as the case may be) and must be marked clearly on the outside with the candidate's name, examination number, and the Honour School in which the candidate is being examined (either Computer Science, or Mathematics and Computer Science).

The bundle must include the declaration form which is included with this notice: on it the candidate declares the work to be his or her own.

Handing in Practical Reports: Candidates must hand these reports in to the Chair of Examiners at the Computing Laboratory by noon on Monday of week 5 of Trinity Term. Details of the hand-in procedure will be sent to you in due course.

Assessment of Practical Work: The examiners will determine a mark for the practical work associated with each computer science paper, taking into account the provisional mark assigned by the demonstrator and their own assessment of the work submitted.

Practicals do not contribute to the classification of candidates but each candidate must pass the practical course in order to pass the examination.

The detailed procedure for assessing practical work is set out in the Examination Conventions but, broadly speaking, a candidate will pass the practical course if they have completed adequately (at Grade S) slightly more than half the practical work for the papers they have chosen.

Project work – Computer Science candidates only

The Form of a Project Report: Computer Science candidates should consult page 205 of the Examination Regulations for directions on the form of the report. An example outline of a project report can be found in the Undergraduate Course Handbook under Section 6 at http://www.comlab.ox.ac.uk/teaching/handbooks.html

Each project topic must have been approved by the Teaching Committee of the Computing Laboratory.

Software demonstrations: For projects that involve the production of software, supervisors will be asked to report whether or not they have seen the software working as intended. It is up to the supervisor and candidate to decide what form the demonstration of the program might take, and to ensure that time is set aside for a demonstration of the final outcome of the project.

Handing in Project Reports: Candidates must hand in two copies of their project report to the Examination Schools by noon on Monday of 5th week of Trinity Term, in an envelope addressed to the Chair of Examiners, Honour School of Computer Science. Please note that candidates should include their name, but not their candidate number, on the project report.

Medical certificates

If evidence of recent medical problems is presented to the examiners via the Proctors, they will take this into account in the classification process. The examiners in Part A may adjust the marks of a candidate in some papers in the light of this evidence, but will in any case pass on the evidence to the Part B examiners in the following year. The examiners in Part B will consider evidence relating to a candidate's performance both in Part A and in Part B. They also may adjust the marks for certain papers, and may in addition deviate in a candidate's favour from the usual relationship between average marks and degree classes, particularly when there is medical evidence relating to Part A, and the candidate's performance in Part B is markedly improved.
Results
The examiners hope to be able to issue the class list by Friday of 10th week of Trinity Term. Details of individual marks will be communicated to tutors shortly after.

Difficulties
Any candidate who encounters difficulties with any of the above should discuss the matter with his or her tutor without delay.

Dr Geraint Jones  
Chairman of Examiners  
Final Honour Schools of Computer Science and Mathematics & Computer Science  
(Hilary Term 2010)
Final Honour Schools of Computer Science and Mathematics & Computer Science

Part B Examination 2010

Declaration form for Practical Work

This form is to be handed in with practical work. The form must be signed.

I declare that the reports on practical work that I have handed in are all my own work except for marks and comments by demonstrators, and other material clearly indicated.

Name  

College

Candidate no.

Honour school

Signature:  Date:
DECLARATION OF AUTHORSHIP – PROJECT REPORT

This certificate should be completed and submitted to the Examination Schools with two copies of your project report by noon on Monday of week 5 of Trinity Term (26th May 2010).

Name (in capitals): 
Candidate number: 
College (in capitals): 
Supervisor: 
Title of project (in capitals): 

Word count: _________

Please tick to confirm the following:

☐ I am aware of the University’s disciplinary regulations concerning conduct in examinations and, in particular, of the regulations on plagiarism.

☐ The project report I am submitting is entirely my own work except where otherwise indicated.

☐ It has not been submitted, either wholly or substantially, for another Honour School or degree of this University, or for a degree at any other institution.

☐ I have clearly signalled the presence of quoted or paraphrased material and referenced all sources at the relevant point.

☐ I have acknowledged appropriately any assistance I have received in addition to that provided by my supervisor.

☐ I have not sought assistance from any professional agency.

☐ The dissertation does not exceed 10,000 words in length, plus not more than 40 pages of diagrams, tables, listing, etc.

I agree also to retain an electronic version of the work and to make it available on request from the Chair of Examiners should this be required in order to confirm my word count or to check for plagiarism.
