

Application for permission to add a Mathematics topic to Schedule B3

Name:

College:.....

I would like to seek permission to take Mathematics Part B, Paper.....
under schedule B3 of FHS Mathematics & Computer Science for examination in 2017.

Tutor's signature:.....

Candidates must take at least two of these recommended units. In addition candidates may apply to take other topics from the list of Mathematics Department courses.

Candidates wishing to take either BSP or BE should first consult with their tutor. They should also complete the online registration with the Mathematical Institute to ensure sufficient resources are available. Requests to take either of these options as the only Mathematics option will not normally be granted.

Please return this form to Jo Leggett, Department of Computer Science by Monday of week -1 of Michaelmas Term, 2016. The Undergraduate Supervisory Committee will consider your request and advise you of the outcome ASAP. Please note that it will not be possible to guarantee that any such addition can be scheduled to avoid a timetable clash.
